

Aerial Work Platform

Aerial Work Platforms - There are lots of accessories for forklifts that can be used to help expand the functionality of your lift truck and allow you to carry items, handle materials with less effort or to complete clean-up tasks.

Several accessories were particularly meant for the blades themselves. For example, fork extensions can be used if you require much more blade length, that increases lifting capability. Blade extensions come in lengths ranging from forty eight to one hundred twenty inches. Rounded or triangular accessories are another variety utilized whenever moving rolled material in order to make certain it does not roll off of the standard flat blades.

Lifting accessories could be pivoting and telescoping crane attachments. They are available in numerous styles. These attachments are often designed for transferring lumber, metal bars, poles or any kind of bulky items. Additional accessories such as different kinds of hook plates and hooks are accessible to pick up items making use of a chain or sling. Magnetic lifters and slab lifters are other objects that can be utilized together with hook accessories. Slab lifters are specialized accessories which are designed for picking up different materials that are delivered in a sheet or slab format. Rug rams or carpet poles are other lifting tools that attach to your forklift so as to make transferring rolls of carpet much easier. The accessory connects onto the lift truck's forks and has a pole which goes through the center of the carpet roll.

There are several kinds of lift truck accessory meant for facility maintenance such as snow blades. These industrial forks could be attached to front end loaders and designed for transferring materials like mulch, snow as well as dirt. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the lift truck blades hook onto for sweeping big spaces like for instance warehouse, factory floors and parking lots. The magnetic sweeper is similar except that it has a magnetic plate rather than bristles. The magnetic sweeper is used in places where there is lots of metal debris like on shop floors for instance. Sweepers have widths up to 60 inches and this surface area makes clean up fast and simple.

A material spreader is another lift truck accessory which is usually utilized at facilities. These spreaders are helpful for various applications like spreading insecticides, seeds, ice melt, rock salt, pellets and fertilizers.

Work platforms are another optional lifting attachment which numerous businesses use day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models presented that are capable of folding up and storing into a smaller space. Work platforms are designed to raise workers up to an overhead location using the lift truck. Larger platform units have extra space for workers in order to bring tools and other necessary stuff meant for the task. Usually work platforms are constructed of poly material or steel.
