

## Drum Clamp

Drum Clamps - Forklifts are utilized to handle lifting, storing and moving pallets. For companies which handle items in drums, you will need to utilize an attachment to be able to store, move and lift them. There are several drum forklift accessories that you can get for all your drum storing and moving requirements. These attachments are specially utilized in order to deal with drum containers - therefore there is no chance of damage to the item or drum container when they are moved, lifted or stored.

### Drum Positioner And Grab

The drum positioner could be utilized to load and unload drums off of drum stands, vehicles and racks. These are obtainable in three or four tine models. This attachment is fully automatic, hence allowing the individual operating it to be able to operate all from the comfort of the lift truck seat. Able to move large and extra large plastic drums, steel, its capacity is 210 liters. This accessory is utilized for drum pyramid stacking.

The drum grab could be mounted to the forks, with a designed purpose of dealing with metal drums that have rolling hoops. Though the original reason for the design was to handle steel drums with rolling hoops, the drum grab can help accommodate plastic drums too. Drum capacity maximum is 210 liters for steel drums with rolling hoops and 220 liters for plastic drums.

### The Rotator

The drum rotator is a forklift accessory which mounts on to the blades themselves. The purpose of the drum rotator is to pick up the drum and rotate it upside down. The drum fits in to the rotator with a steel clamp that fits over the middle of the drum. The rotation is done by either a continuous loop chain or a crank handle. The crank handle is utilized for operations which occur below shoulder level. For operations which must take place higher than shoulder level, the continuous circle chain will be utilized.

The drum tines are simple fork or carriage mounted accessories. They are designed for unstacking and stacking 210-liter metal drums. Stacking involves nothing intricate, only easy horizontal positioning of the drums. The carriage-mounted enhancements reduce the load center of the drums.

### Automatic Tongs

Drum tongs are obtainable both automatic and semi-automatic units that can be utilized in the tight head and open topped metal drum kinds. The drum tongs can even be connected several various ways to the lift truck. One way is to attach them under a fork-mounted hook. One more way is to connect them to a carriage mounted jib or a fork-mounted jib. Either the automatic and semi-automatic have a drum capacity of 210 liters. With the automatic, there is no requirement for the person operating it to ever leave the seat of the forklift.

### Rim Grip Handler

The Rip Grip Drum Handler is the optimal alternative for forklift attachments, whenever there is a need to store drums with limited area accessible. This accessory could be utilized on both 120L and 210L drums. The Rim Grip Handler operates by utilizing steel jaws so as to grab the edge of the drum. It lifts the drum and sets it down without requiring any room between the drums. The standard model used in the business is a zinc-plated handler, although, this particular attachment comes accessible in stainless steel for the food and drink market.
