

## Remanufactured Lift Truck Parts

Remanufactured Lift Truck Parts - Lift trucks are somewhat pricey pieces of machinery because a brand new electric lift truck model can cost starting from \$18,000 to \$25,000, for a 5000lb equipment. Also, a few thousands of dollars will have to be invested in a battery charger and battery. A similar internal combustion forklift of similar lift capacity would cost slightly less and the diesel units that are capable of heavier lifting capacities could cost upwards of \$100,000. Reconditioned forklifts are an alternative so as to save a great deal of cash since they cost less than half the price of new units.

Some buyers may be apprehensive about acquiring a used or reconditioned forklift for the reason that they feel they will have to spend more on upkeep. However, a correctly reconditioned lift truck will be able to function just as well as a new one. Even though your lift would get heavy use, as long as you take good care of the machinery, it would serve your requirements and possibly save you lots of cash.

When considering acquiring a used forklift, it is vital to determine what the seller means by the term reconditioned or refurbished. Many companies do an excellent job of totally making over the unit before reselling it. This consists of disassembling the forklift, rebuilding the engine, sandblasting the lift and afterward reassembling everything and finishing with a fresh coat of paint.

To correctly and meticulously rebuild a lift truck engine, a good business will totally disassemble it. A heat cleaning system can then be used to clean all the parts. As soon as this step has been completed, all of the parts are checked to see if they have any breakage, any extensive wear or any defects. Particular components like for example cylinder blocks, connecting blocks, cylinder heads and crankshafts are resized, reground and resurfaced if necessary. Other components such as gears, nuts, bolts and so forth. are repaired or replaced as needed.

As soon as the overhaul has been accomplished, the engine is rebuilt by hand. After being reassembled, a series of tests are applied to the running equipment in order to check all of the components and be positive there are no leaks or problems. If any problems occur, the necessary adjustments are done.

There is no reason to be concerned about buying reconditioned lift trucks from quality sellers. The process the equipments go through to be rebuilt ensures the utmost reliability. Maintenance costs can truly work out to be less for the reason that you will avoid the initial phase of higher repairs projections that a new lift truck has as it is broken in. By following routine upkeep schedules and taking care of the machinery correctly, a reconditioned forklift would serve you well.
